

Executive Functioning and Organizational Skills Workshop

Setting your Student up for Academic Success!

Presented by the **ADHD Center for Success**

What Are Executive Functions?

Executive Function refers to a variety of brain functions that contribute to a student's academic success. Deficits in executive function skills may include difficulties with: *organization, getting started and finishing work, memorizing facts, writing essays or reports, working complex math problems, remembering what is read, completing long-term projects, being on time, controlling emotions, and planning for the future.*

This 6-week workshop is designed for students who experience challenges with Executive Functioning and overall academic organization. Great for students with ADHD, and/or learning challenges. This workshop will integrate student needs based on their individual learning styles, and help students apply strategies to current schoolwork.
